The receptacle, water shut-off valve and drain pipe must be within 3 feet (36 inches) of the center of the location (footprint) of the machine.

Ideal under counter space for softener: 30 inches (minimum requirement: 26 inches).

**Notes:** Access hole is only required if any of the utility hook-ups are located under the counter. Drain pipe is only necessary if the drain line from the drain tray is mounted fixed. A removable drain tray does not require a drain pipe since it will be emptied by the operator.
